Memo. No. 204 / Trg / BODHI / 2013

Bhopal dated 13/06/2013

To,

The Chief Engineer,
----- Basin/ Project
Water Resources Department
-----, (M.P)

Sub: - Preparation of Operation & Maintenance Manual of Water Resources Projects.

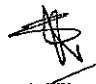

Operation and Maintenance is an integral part of all water resources projects. It is essential that all the water resources engineers and personnel's responsible for managing the projects are conversant with the O&M needs and requirements of water resources structures. Various circulars and directions have been issued time to time for O&M of water resources projects.

In chapter 8 of works manual there is a provision for O&M procedure therefore O&M manual which covers all relevant guidelines for components of dam, canal, appurtenant structures, canal and reservoir operation plan, equitable water distribution is being prepared by BODHI. This manual will aim at providing general guidelines for maintenance and operation of Water Resources structures of the state and can be used to prepare individual O&M manuals for each dam and canal taking into account individual site condition of the system.

I invite your valuable suggestions and comments which will be incorporated in the manual. You can visit and take help of following websites to achieve a valuable outcome in this regard.

1. waterresources.rajasthan.gov.in (under heading O&M Plan guidelines)
2. www.dowrorissa.gov.in (under heading canal lining & system rehabilitation guideline)
3. guj-nwrws.gujarat.gov.in (under heading manual and guide lines)

You can also visit website of other states. Your efforts will be appreciated and gratefully acknowledged.
